PROFILE

Senior Frontend Engineer with 6+ years delivering scalable, high-performance web and mobile applications in fintech and SaaS environments. Deep expertise in React, TypeScript, and real-time systems, with a track record of owning complex features end-to-end — from architecture through production. Proven ability to lead market launches, drive conversion with A/B testing, and mentor engineers. Fully eligible to work within the EU.

CORE SKILLS

Languages & Frameworks: React, React Native, TypeScript, JavaScript (ES6+), Next.js, Vue, GraphQL, Node.js, Tailwind CSS, Material-UI
Tooling & Practices: REST APIs, WebSockets, Redux, React Query, Jest, PostHog, Firebase, GCP, A/B Testing, Agile, Code Review

PROFESSIONAL EXPERIENCE

Software Engineer II Aug 2024 – Present
Quidax — Crypto & Fintech Platform Remote

- Architected and led the **Ramp product** (crypto on/off-ramping), personally coordinating engineering-driven marketing rollouts with user acquisition strategies.
- Spearheaded the **Ghana market launch**: implemented mobile money (MoMo) integration, GHS wallet, and KYC workflows with zero-downtime release.
- Delivered advanced trading features (Favorites, portfolio toggles, ODB charts) and high-impact A/B-tested landing pages, driving measurable conversion lifts.
- Integrated Tiering & Cashback APIs and led stability efforts during high-traffic launches, maintaining **100% uptime** at scale.

Frontend Engineer Mar 2022 – Aug 2024
Quidax — Crypto & Fintech Platform Remote

- Delivered full **Orderbook V1** trading workflows (pair selection, order placement, cancellation) **six weeks ahead of schedule**.
- Architected an auto-voucher withdrawal system that significantly reduced user wait times and operational overhead.
- Introduced PostHog analytics platform-wide, enabling data-driven product decisions; integrated Platinum and Fincra payment gateways and shipped 2FA.
- Built React Native mobile screens, announcement banners, and savings withdrawal flows, improving retention and communication.

Frontend Engineer Sep 2018 – Feb 2022
Digital Pulse Technologies Lagos, Nigeria

- Built a nationwide helpdesk for Nigeria's national examinations body, reducing technical issues by **70%** and improving fraud detection.
- Engineered reporting platforms for the National Identity Management Commission, contributing to **30% revenue growth**.

SELECTED PROJECTS

Gravy (React Native, TypeScript, GraphQL, React Query) 2024 – Present
Cross-platform fintech app on the Google Play Store. Led full development lifecycle — architecture, GraphQL/React Query data layer, responsive UI, and Play Store release.

Duro (Next.js, TypeScript, Firebase, Jest) May 2023
Virtual queue management system with QR code booking and SMS integration. Sole developer; delivered production-ready on time despite resource constraints.

EDUCATION

M.Sc. Information Management — Digital Transformation (In Progress) Sep 2025 – Jun 2027
NOVA Information Management School (NOVA IMS), Lisbon, Portugal

Postgraduate Diploma in Computer Science 2016 – 2017
University of Ilorin, Nigeria

MENTORSHIP & LEADERSHIP

- **Engineering Mentor**, Code the Dream (USA, remote), Mar 2024 – Present: Guiding underrepresented engineers through project-based curriculum and code review.
- **Senior Mentor**, Enye Graduate Accelerator, Lagos, 2019 – Present: Coaching engineers on frontend best practices, system design, and career growth.
